

Baseline 7-piece Hand Evaluation Set:

This kit is used by many professionals in the health and safety fields. The Baseline 7-Piece Hand Evaluation Set includes a storage case for easy transport. The hand dynamometer (hydraulic) can assess grip strength while pinch strength can be assessed using the pinch gauge (mechanical). Also included is a two point discriminator with third point, stainless steel goniometer, Wartenburg pinwheel, functional finger motion gauge and a finger circumference gauge. This makes the kit a perfect assessment tool for hand evaluations.

Specifications:

The Baseline 7-piece Evaluation Set (12-0113) contains: hand dynamometer (hydraulic), pinch gauge (mechanical, two point discriminator with third point, stainless steel goniometer, Wartenburg pinwheel, functional finger motion gauge and a finger circumference gauge.
